

# Portland Creek Hunting & Fishing

Great Newfoundland Adventures  
for those who love to hunt and fish!

## The Sportsman's Paradise

- Moose
- Woodland Caribou
- Black Bear

Want to take the hunting or fishing trip of a lifetime one that you've always dreamed about?

We'll take you to remote areas where hunting and fishing is at its very best.

**LOCATION & SEASONS** Two of our camps are located in Northern Newfoundland - Area 3, which can be reached only by float plane. Our camps here can accommodate 3 or 4 hunters each week, for single game hunts or combination hunts!

Belby, Owl Pond and Christopher Lake are located in Area 45, which is also in Northern Newfoundland. Those camps can be reached by Ski Dozer or Plane, and can also accommodate up to 4 hunters each week.

Moose antlers are a unique trophy, and are a real prize to take home! The cape may also be taken, if desired. Moose meat is also very delicious to eat, and you will certainly want to take all or some back home with you.

Woodland Caribou are also within easy access of the camps. Caribou are excellent to eat! The large males have spectacular racks of antlers for hunters seeking the trophy of a lifetime! Our success rate has been between 95-100%.

The seasons for moose, caribou, and black bear opens the second Saturday in September and we hunt until late October. Bow season opens two weeks prior to rifle season.

**COME PREPARED** We recommend that all hunters bring high-powered rifles equipped with scopes, that have see through under open sights. Rifles should be sighted for 150 to 200 yards.

Each hunter should bring warm sleeping bags, warm clothing, good rubber footwear (approximately 12-16 " high) binoculars, good rain gear and of course, a camera for those spectacular pictures of your trip.

Because we have some fly-in camps, you should try to keep your gear as light as possible, approximately 60 pounds per person or less.

**MEAT CARE** We will take good care of your meat. We have meat houses at our camps. Each hunter's animal is put in heavy white cotton bags, tagged, and shown instructions as to what you want done with your meat after it is taken out of the camp. Meat cutting and packaging is available and done right here, at your request.

**THE ACCOMMODATIONS** Each camp is inspected annually by government inspectors and must exceed Newfoundland Tourist Development requirements.

Each camp has guest bedrooms with two single beds in each room.

Cook's and guide's quarters are separate from the guests. Our cook will prepare hearty breakfasts each morning and a hot home style meal every evening.

**GUIDES** We believe our guides play a very important role in the success of your hunting trip and our business! We provide experienced, professional guides who will work hard each day to ensure that the hunters get their game. A lot of hunting is done by “spot and stalk”. Also guides will try their skill of “moose calling” around mid September when the rut begins.

**ADDITIONAL COSTS** Liquor and tips are at the guests discretion. Hotel accommodations, if necessary. Also, extra fee for cutting, packaging and chilling or freezing of meat. To fly meat home, air cargo cost approximately \$2.50 Canadian per pound.

Cheques for License fees and reservations should be made payable to Aster Caines or Portland Creek Hunting and Fishing.

Personal cheques are accepted for License fees and deposit only, but not for final settlement of account. Balance of payment is due on arrival of trip. Cash, cashiers cheques, and travelers cheques accepted. Hunters will not be transported to lodge until his/her account has been settled.

**CASE OF CANCELLATION** Once Licenses have been issued by the Department of Tourism, there will be no refund on License fees, but License and deposit may be transferred to another person.

**ARRIVAL AND DEPARTURE** Hunters are flown into the camp on Sunday and flown out the following Sunday weather permitting, unless you have booked a 10 day hunt.

**OTHER HELPFUL TIPS** There is excellent fishing in Newfoundland and Labrador for salmon, brook and sea run trout. The best time to fish Labrador is from late June to late August. Please inquire about our fishing brochures.

Sometimes choosing an outfitter can be very difficult. Some outfitters tend to over hunt their area, this makes it very difficult to find game.

If you decide to come with us, i'm sure you will have a successful and memorable hunting or fishing trip.

Hunters should book early to avoid disappointment, because Licenses are limited.
